

What does an attention field do?

PRF

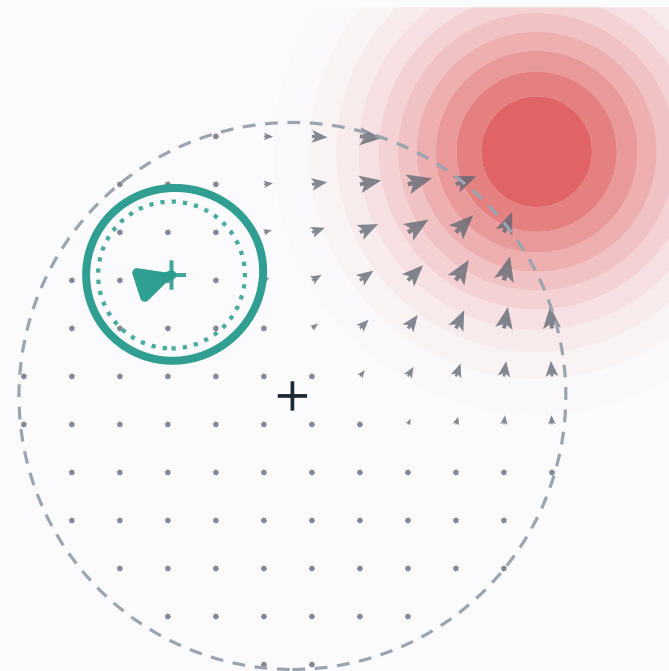

$$\text{PRF}(\mathbf{x}; \mu_{\text{PRF}}, \sigma_{\text{PRF}})$$

Attention field $M = 1 + g \cdot G$

$$M(\mathbf{x}) = 1 + g \cdot G(\mathbf{x}; \mu_{\text{AF}}, \sigma_{\text{AF}})$$

Effective RF

PRF is reshaped; CoM shifts toward the AF
