| Model | Parent | Adds | Contrast | LOSO % improved, DoG | DN |
|---|---|---|---|---|---|
| m00 | | pRF on the bar | | | |
| m0 | m00 | Search items, weight fitted | Items | 100 | 100 |
| m1 | m0 | Target gain | T | 90 | 97 |
| m2 | m0 | Singleton gain, same at all locations | D | 50 | 53 |
| m3 | m0 | Sustained gain, same at all locations | S | 90 | 90 |
| m3b | m1 | Singleton gain | D given T | pending | pending |
| m4 | m3b | Sustained gain | | | |
| m5 | m4 | Sustained gain differs at HP | dS | 77 | 63 |
| m6 | m4 | Singleton gain differs at HP | dD | 63 | 67 |
| m7 | m5 | Both HP-specific terms | | | |

LOSO: share of 30 subjects whose held-out prediction improves when the contrast is added with the effect size from the other subjects (median over ROIs). Provisional: current inputs.
