a
Target gain grows along the hierarchy; dS does not detectably
Term / its pooled median
Shared sustained gain
Target gain
Distractor gain
Sustained HP – LP (dS)
Area pRF size, σ (°, log scale)
b
Slopes, normalised (n = 28)
Target gain
Distractor gain
Shared sustained
dS
+1.35 [+0.87, +3.40]
+0.61 [-0.98, +3.06]
+1.90 [+1.53, +2.37]
-0.96 [-2.52, +1.79]
Slope per doubling of pRF size
(proportion of the term's pooled median)
c
Target gain
Distractor gain
Shared sustained
dS
Gain (%)
Smallest third
Middle
Largest third
pRF size within an area
d
Sustained width: -2.52° per doubling [-9.93, -0.56]
(|gain|/SE > 3: +nan° [+nan, +nan])
Sustained field FWHM (°)
Item spacing
5.7°
Area pRF size, σ (°, log scale)
