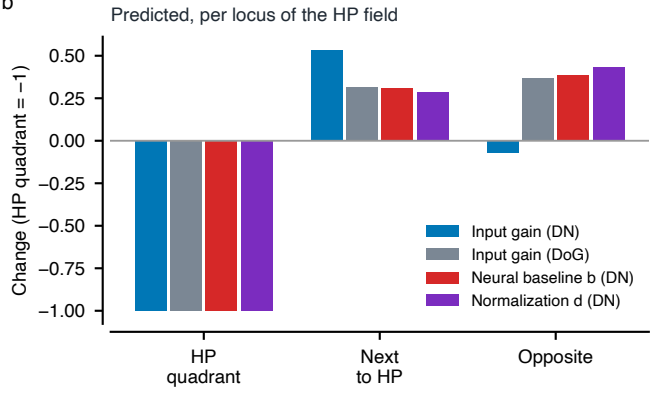
a

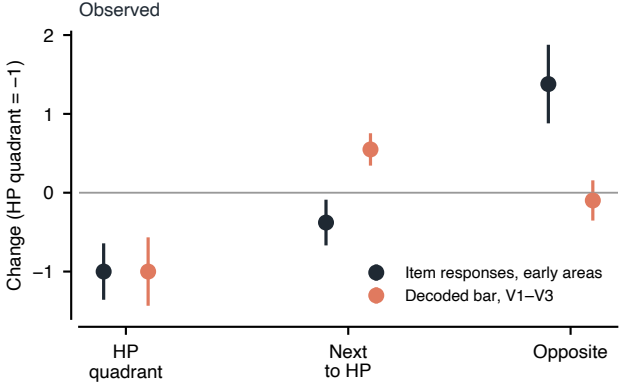
$$N = \frac{a\,(S_{\text{eff}},\, G_c) \;+\; b}{c\,(S_{\text{eff}},\, G_s) \;+\; d} \;-\; \frac{b}{d}$$

$$S_{\text{eff}} = S \cdot (1 + \text{field})$$

- Input gain: field scales the stimulus S
- Baseline: field scales b
- Normalization: field scales d

b





d
